

## Sightings of three Crane species (Family Gruidae) in South Africa

The Endangered Wildlife Trust / International Crane Foundation Partnership's African Crane Conservation Programme has recorded over 20 000 crane sightings in South Africa, as well as other African range states, in collaboration with partners. Raw data, from 1978 to 2014, can be downloaded at <https://www.gbif.org/dataset/b9f3beb1-13c0-484e-886b-83e9062be37a>, or more recent data can be requested at <http://www.ewt.org.za/biodiversitydata.html>. Please note that absence of data does not mean that there are no cranes in a locality, only that no records are held in our database.
