

## Wildlife Mortalities on Electrical Infrastructure

The Endangered Wildlife Trust's Wildlife and Energy Programme has recorded over 7 000 wildlife mortalities on electrical infrastructure in South Africa, in collaboration with ESKOM and other partners. Raw data can be requested at <http://www.ewt.org.za/biodiversitydata.html>. Please note that absence of data does not mean that there are no mortalities in a locality, only that no records are held in our database.
