

Wildlife roadkill incidents in southern Africa

The Endangered Wildlife Trust's Wildlife and Roads Project has recorded over 12,000 wildlife road mortality incidents in southern Africa, in collaboration with numerous partners and supporters, who are dedicated to minimising the negative interactions between wildlife and transport infrastructure. These include Bridgestone SA, Bakwena Platinum Corridor Concessionaire, Ford Wildlife Foundation, N3 Toll Concession and TRAC N4. The dataset spans from 1949 to 2017, but most data were collected from 2009 onwards. Data can be requested at <http://www.ewt.org.za/biodiversitydata.html>. Please note that absence of data does not mean that there are no mortality incidents in a locality, only that no records are held in our database.
